Patiently waiting for this wonderful view between the ears on the trail!

Hello!!

I hope everyone has survived all the rain so far but I could sure do with some nice sunny weather for a while!

We survived our first show of the season as the rain had put a damper on it but the arena was in great shape! And we had a few other difficulties but we all came through it with a successful show. Great big thank you to all our staff and the volunteers that helped make it run smoothly! Now on to the Pinto Words for some exhibitors and a few of our Indiana members that work the show. Good Luck to all and safe travels!

Our next show will be the ECPJ in New Castle August 5-6 with Tri-State Pinto and Ohio Pinto. That's always a great show!! Then onto our Fall show September 9-10 also in New Castle. Can't wait to see the show grounds as they have made many updates to the barns and indoor arena!

We are still planning on a trail ride this year—thinking late September or early October at Midwest Trail or Hoosier Horse Camp, both in the Hoosier National Forest. Or possibly staying closer to home at Salamonie or Tippecanoe State Park on any given weekend. Come join us!! We always have a lot of fun!

Hope to see you all at some of the upcoming shows!

Happy trails,

Jill

IPtHA President

CONGRATULATIONS **CLASS OF 2017!!**

TOXIC PLANT POISONING: PREVENTION IS BEST APPROACH

HISTORY

A puzzled client called reporting that he had found his 8 year old Belgian gelding dead in the pasture with no apparent abnormalities. The horse had worked and been fine the previous day. The owner was concerned because he had found a 5 year old Standardbred dead in the same pasture under similar circumstances just a few days prior. A visit was scheduled for a necropsy (autopsy in humans) to try to discover the cause of death.

EXAMINATION

Upon visual inspection, we found the Belgian gelding to have no obvious abnormalities. He was in good flesh and had a normal hair coat. The necropsy revealed no obvious cause of death. Tissue samples were collected for histopath examination. Knowing that most horses with no obvious lesion die of cardiac causes, we concentrated on questions to the owner to determine a possible cause.

When the topic of poisonous plants was discussed, the owner acknowledged that he had dumped some trimmings from Japanese Yew onto a burn pile in the field where the horses were pastured. Japanese Yew is a common ornamental shrub that is used for foundation planting around homes. One mouth full of this toxic plant is enough to kill a horse! The pasture was eaten down enough that there was little or no desirable grazing left. I felt that poisoning from the consumption of the toxic Japanese Yew was most likely the cause of death for both horses.

DISCUSSION

There are many poisonous plants that grow in our area that may affect horses. Cardiac glycoside containing plants are highly toxic. They cause progressive interference of the electrical activity of the heart until it stops. Depending on the dose, the owner may see colic, sweating, diarrhea, cold extremities, dilation of pupils, discolored mucous membranes, and death.

Important plants to be aware of include Japanese yew, foxglove, oleander, lily of the valley, dogbane, rhododendron, and many others including milkweed.

Japanese Yew

Lily of the Valley

Milkweed

There are several other poisonous plants that affect horses. Poisonings become more common when pastures are eaten down or stressed. Horse owners should become familiar with poisonous plants for the safety of their horses.

Test your knowledge by answering TRUE or FALSE to the following statements:

1. Rhubarb is a poisonous plant.

2. Fescue grass may be poisonous to horses.
3. Walnut trees may be life threatening to your horses.
4. Roundup herbicide, or the active ingredient glyphosate, may be toxic to horses.

The correct answer to all statements is true.

CONCLUSION

When it comes to poisoning, prevention is a far better approach than treatment. Maintain your pastures by eliminating toxic plants and taking measures not to overgraze the area. Before planting ornamentals in any area that horses may access, check your selections to be sure they are not toxic. You can view a list of plants that are toxic to horses and other pets at ASPC.org. You can also call your county extension agent to come evaluate the contents of your pasture and identify toxic plants. This is a free service, just visit purdue.edu to find the contact information for your county.

Register your horse as PINTO

Get a 50% discount!

If you are in 4-H, you can register your horse as pinto for a 50% discounted rate. You must have/show proof of 4-H membership.

How can my horse be registered as a pinto you ask??
That's easy!! Your horse, pony or miniature have to meet the color requirements. A horse must have 4 inches total of eligible white in qualifying zones, whereas a pony must have 3 inches and a miniature must have 2 inches total. Even solid colored horses can be registered in the Solid Division.

For all details please see the Pinto Horse Association of America Inc. rulebook and registration forms on their website
www.pinto.org

Once your horse is registered please join the Indian Pinto Horse Association at their shows this summer!! We have a number of classes for both youth and adults, including showmanship, western and English horsemanship, driving and even have fun classes sponsored by our youth members.

Come and join in on the fun!!
